

The worlds best
reusable earplug,
that blocks out
harmful noise,
while preserving
superb sound
quality.

HAPPY EARS of Sweden are a patented earplugs that protect ears from harmful noise, while preserving good sound quality and feeling. It's like turning down the volume on the sound system. Whether for music/clubbing, sleep or travel Happy Ears will help. The earplugs come in three colours and sizes.

"We are very excited to launch our patented earplug at Maison & Objet 2015. Happy Ears are discreet when in the ear, and function as turning down the volume on the sound system." - Jukka Viitasara, Design Director/partner

First prototype version was launched in Scandinavia in 2012 and now it is time to take the final step to complete this unique earplug. On Maison & Objet 2015 we will launch the brand new 2.0 version.

Happy Ears are made of medically approved material, are also CE-certified and allergy tested. No filters or mechanics are needed. Low tech and easy to use. Happy Ears will be made in Stockholm, Sweden.
